Jonathan Tran

San Francisco | 415-509-8027 | jnthntrn@berkeley.edu | linkedin.com/in/JnthnTrn

Education

University of California, Berkeley Expected May 2027

Bachelor of Arts in Data Science and Computer Science

Coursework: Computer Networks, Operating Systems, Machine Learning, Computer Security, Database Systems, Computer Architecture, Data Structures & Algorithms, Principles & Techniques of Data Science, Distributed Systems

Experience

iPick.AI – Machine Learning Engineering Intern Sept. 2026 – Present

- Building an LLM-powered **(Claude/Codex API) portfolio optimization tool** that analyzes user holdings and generates risk-weighted investment recommendations
- Implementing a **reinforcement learning** system using weekly stock performance feedback to continuously improve ranking accuracy for **high-growth and high-risk equity** picks across **5000+ stock options**

ManuFlow – Software Engineering Intern Jan. 2026 – Apr. 2026

- Engineered enhancements to an **ETL pipeline** to support dynamic schema extension, enabling persistent storage of **custom fields in Supabase** and improving data traceability
- Designed an **LLM-assisted system** to standardize and deduplicate custom fields, improving consistency and reducing schema growth across large datasets

Hatch – Software Engineering Intern Sep. 2025 – Dec. 2025

- Refactored **legacy UI components** to migrate the app onto a new design system, reducing styling inconsistencies and improving maintainability
- Contributed to a full-stack mobile application serving **4M+ users** by implementing a combinatorial alarm-configuration system, enabling **182,880 distinct alarm behaviors**

Salesforce – Data Analyst Intern Aug. 2021 – Jun. 2022

- Analyzed and visualized sales data within Salesforce's cloud platform, delivering reports that informed decision-making for cross-functional Engineering and Product teams
- Refined sales metrics in collaboration with Engineering and Product Management, improving data accuracy and alignment with business objectives

Projects

LoL Game Performance Analyzer and Feedback Generator (Ongoing) | TypeScript, Next.js, Node.js, Express.js, AWS

- Built a full-stack performance analyzer with a **Next.js/TypeScript** frontend and **Node.js/Express** backend, integrating the **Riot Games API** to fetch and display real-time match history for any player
- Designed **RESTful API** layer that transforms raw Riot API responses into clean player-specific stats (KDA, CS/min, vision score), implementing a **Cache Aside pattern** with **AWS DynamoDB** to reduce redundant API calls
- Established a **CI/CD pipeline** via **GitHub Actions** and containerized the full stack with **Docker**, ensuring consistent builds across development and deployment

SaveBites | Next.js, Node.js, Tailwind CSS, React, JavaScript

- Developed an **OCR** receipt scanning feature, supporting **10+ different receipt formats** for ingredients, later utilized to generate recipes
- Developed an interactive front-end with **React** (JavaScript) and backend services using **FastAPI** and **Node.js,** integrating **MongoDB** for efficient data storage, retrieval, and cross-validation

Leadership

Open Project – VP of Professional Development Aug. 2025 – Present

- Led team of **14 engineers** designing full-stack web app aimed at reducing food waste and helping students save money by tracking grocery items, predicting spoilage, and suggesting recipes from existing ingredients
- Directed technical resume workshops for **300+ students**, reviewing **50+ individual resumes** and standardizing feedback on formatting and keyword optimization to improve recruiting pass-through rates

Technical Skills

Tools: Linux/UNIX, Git, Docker, AWS, VS Code, Figma, PyCharm, IntelliJ, Cursor, Jupyter, Google Colab
Languages: Python, Java, C, TypeScript, JavaScript, SQL, Rust, RISC-V, R
Skills: TCP/IP, Seaborn, Machine Learning, EDA, Probability, Regression, PostgreSQL, MongoDB (NoSQL), MySQL, React, Django, Next.js, Tailwind CSS, Node.js, Unit Testing, Logisim, JUnit, LaTeX, Express.js, Redis, REST APIs
